

Aerosol School 2015

Oct 7th, 8th and 9th, 2015
at Firestone Research Aerosol Laboratory
St Joseph's Healthcare
Hamilton, Ontario, Canada
Sponsored by ISAM and McMaster University

An intensive 3-day curriculum for scientists, technicians, students designed to provide the didactic background and practical hands-on experience to quantify and characterize medical aerosols. Presented by 10 faculty representing aerosol scientists, engineers and clinicians. Upon completion of the program, participants should understand the measurements and techniques utilized in commercial pharmaceutical and biotech laboratories as well as in academic research. The perfect primer for anyone interested in measurements of medical aerosols, whether for industry, clinical research or regulatory approval.

Registration - limited to the first 20 participants to assure good hands-on experience. For further information please contact: Myrna Dolovich at mdolovic@mcmaster.ca or call 905 522 1155 x33597 Web: www.aerosolschool.com
